

Four simple steps to construction site connectivity

Get your site up and running in no time, with Daisy Quick-start's hassle-free rapid deployment service.

Step 1: Outline your requirements

However large or small your project, we can equip your site office with the hardware, software and infrastructure you need - from WiFi/Internet Connectivity to multi-level security, guest access, contractor portals and more.

Flexible
fully-scalable
solution

Fast
rapid deployment

Step 2: Get up and running in record time

Forget waiting 30 days for a fixed line. With 4G connectivity and Daisy as your sole provider, work can get underway much more quickly, and for less.

Opt for fully-managed installation or have all components delivered ready for in-house deployment.

Secure
includes
intrusion detection,
network separation,
firewalls

Hardware
includes laptops,
PCs, tablets, phones,
printers, network
equipment

Step 3: Move around as often as you need

Need to move your project site office? No problem. Simply take everything with you. These robust, secure, portable solutions are designed to last.

Step 4: Build a long-term solution

Going to be onsite for a while? Why not install a fixed fibre or ethernet line in parallel, and leave your 4G connectivity in place as a reliable backup.

Software
licenses include
upgrades
