

INTELLIGENT WIFI FOR FINANCIAL SERVICES

Make sure network security and compliance reign supreme in today's mobile environment.

If you're a financial services provider, world-class mobile networking is essential to empower your people, meet customers' service expectations and keep your business competitive. However, ever-growing regulatory compliance requirements and network security threats mean you must secure your mobile environment without placing a burden on your workforce.

Greater complexity of mobile workflow

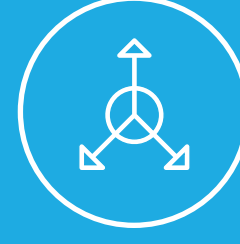

Environments
Internal networks
Customer portals
Guest WiFi

Users
Employees
Customers
Guests
Contractors

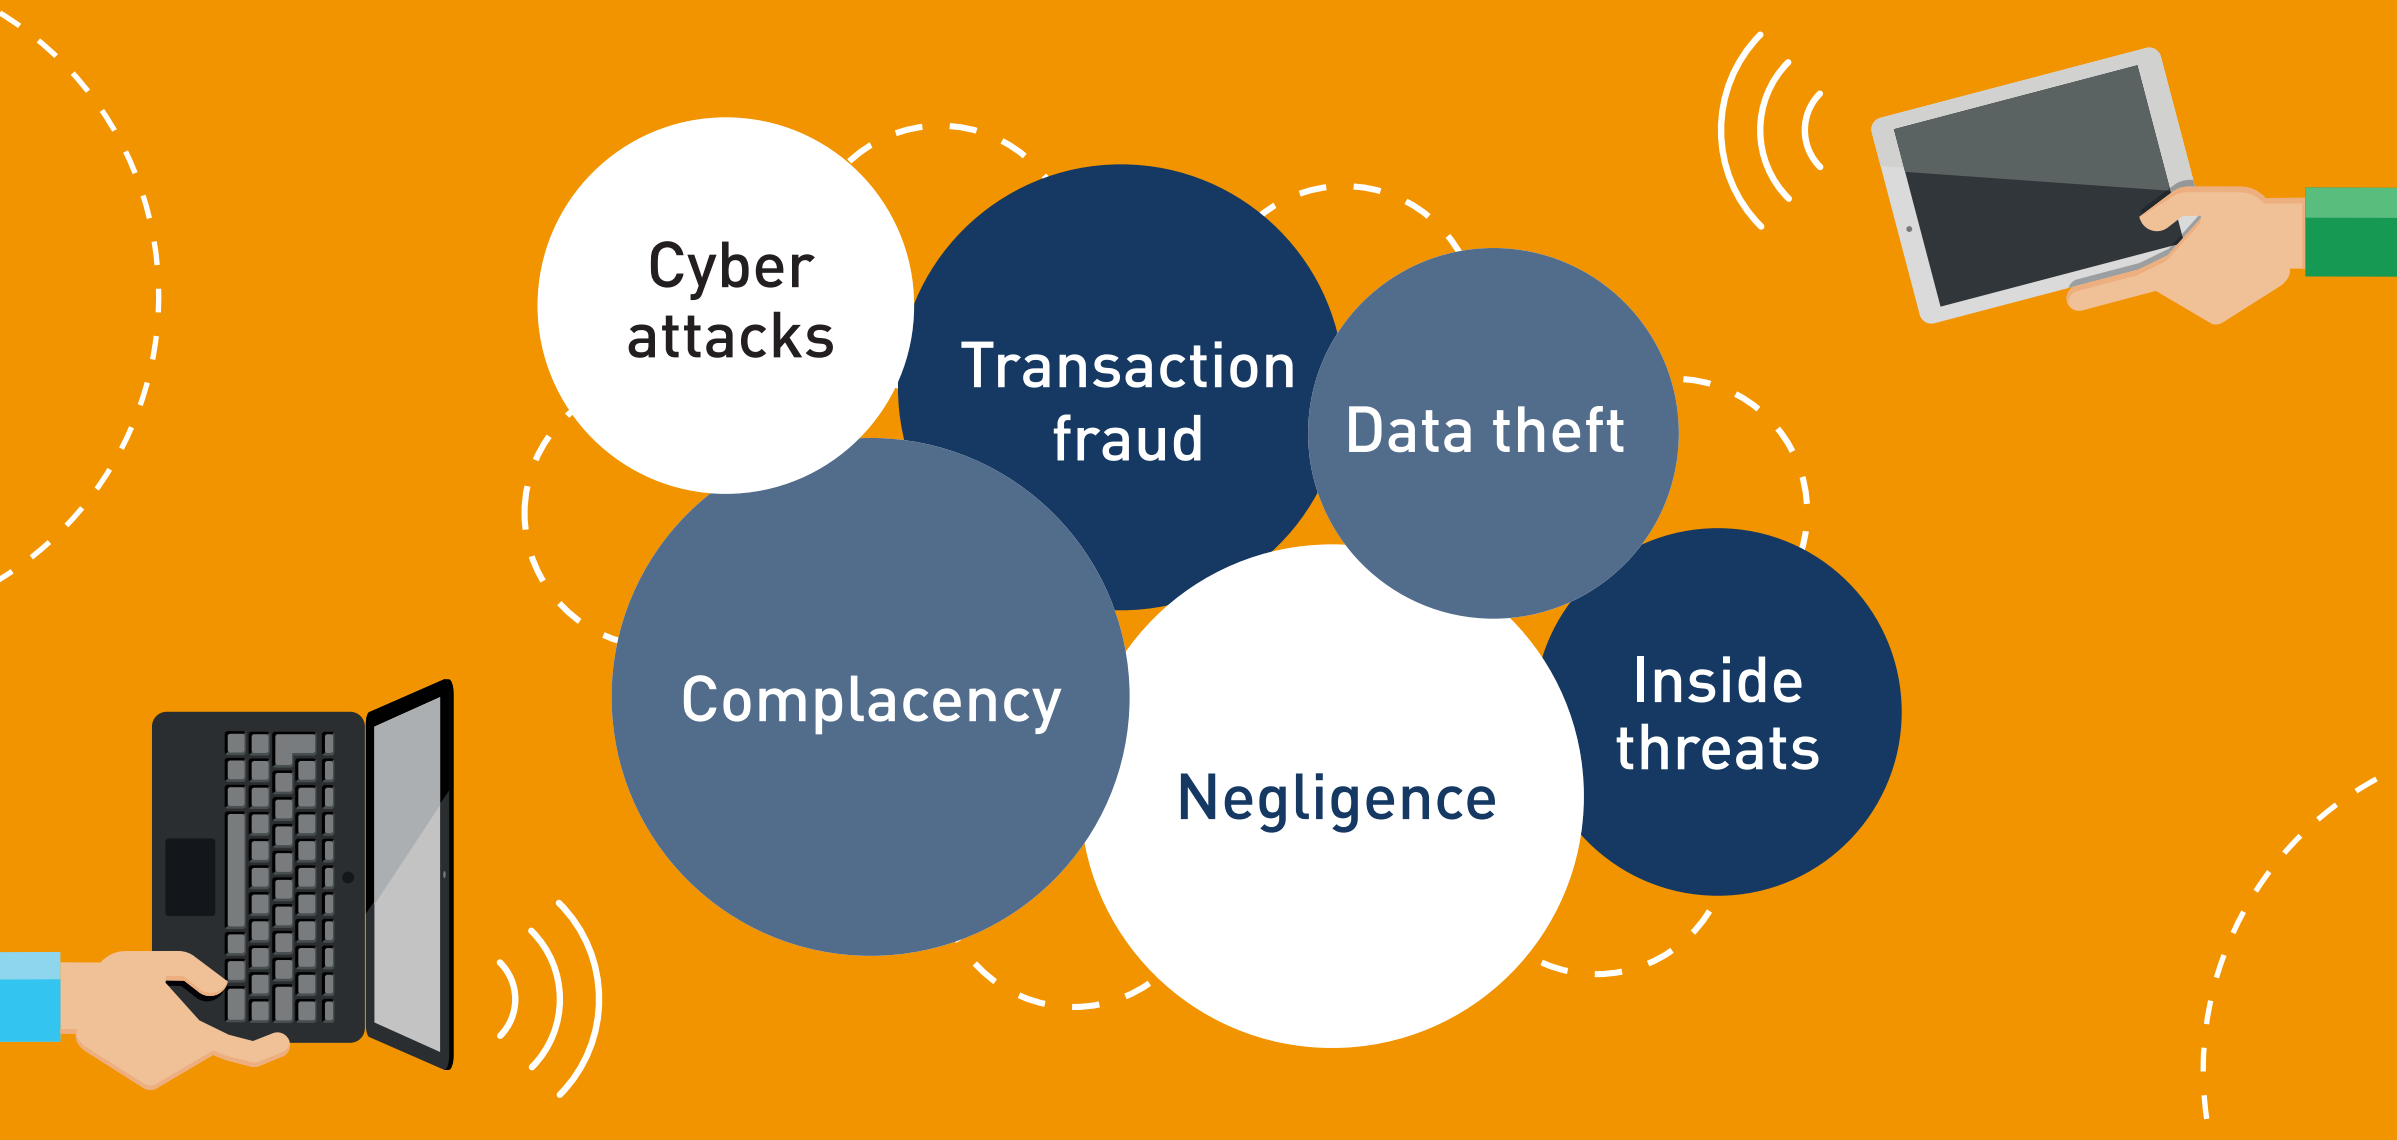

Devices
Laptops
Smartphones
Tablets
Internet of Things

Device provenance
Company-issued
Employee "BYOD"
Customer devices
Contractor hardware

Greater threat potential

Forward thinking financial services organisations need intelligent network access control

Introducing

Aruba Clearpass

VISIBILITY

- See which devices are connected to your networks at all times
Laptops, Smartphones, Tablets, Internet of Things
- Track activity
Employees, Customers, Guests, Contractors
- Identify device operating systems
- Flag device "healthcare" issues

CONTROL

- Stipulate how each device can connect and which parts of your network it can access
- Automate the application of advanced policies and authorisations
- Streamline processes with secure self-service on-boarding for guest and employee BYOD

RESPONSE

- Integrate threat data from across your networks, even if you use multiple vendors
- Build an early, nuanced and actionable picture of potential threats from multiple sources
- Automate and unify attack responses across your networks

Safe mobile networking:
anytime, anywhere, any device.
