

TRANSPORT & LOGISTICS:

Develop the integrated, all-round digital fitness to thrive in your industry

As new players and new technology disrupt this already competitive sector, we can help you plan a **joined-up digital transformation** to meet your goals, delight customers and stay ahead of the market.

More efficient and effective

- All your systems on one integrated network
- Scale network capacity to meet demand
- Collaboration tools for ultra-efficient workflow
- Optimise route and schedules; anticipate obstacles

YOUR OPERATION

- Instant, centrally-applied patches and updates
- System backup and Work Area Recovery
- World-class system security
- Partnered with Palo Alto, Cisco, Aruba etc.

More secure and resilient

Provide a sector-leading service to businesses whose assets you store or transport

- Full choice of contact channels (voice, email, webchat, video)
- AI and data analytics to optimise interactions
- Seamless mobile access to customer data
- Remote inventory checks and bespoke offers
- Real-time order tracking

YOUR CUSTOMERS

Deliver a more personalised service to delivery recipients and passengers

Supply total on-the-move apps and connectivity to drivers, account managers etc.

YOUR PEOPLE on-site

YOUR PEOPLE in the field

- Fully mobile desktop and apps
- Secure, convenient file sharing
- Remote, interactive training
- Dynamic collaboration tools (file sharing, voice and video meetings)

From planning and support to contact centre teams, give everyone the tools to do their job
