Ways to Secure Christmas (and Beyond)

As the merriment of the festive season starts to unfold, hackers are using this diversion as the perfect opportunity to dig deep into your business' data, so if you'd like to stay on top of the latest threats, our Daisy Security Advisor solution may have just gone straight to the top of your wish list.

Daisy's Security Advisors are for those who need the services of a chief information security officer (CISO), but don't need another full-time resource. Working as an extension to your IT team to deliver high-value security expertise which is tailored to your wants and needs, our little helpers relieve you of the stresses and strains associated with cybersecurity – not just for Christmas but for years ahead too.

HERE'S A LIST OF 12 THINGS THIS SOLUTION CAN BRING:

#1

Work on your behalf to improve your security posture and protect against cybersecurity attacks.

#2

Develop and implement a strong threat management strategy with input from key areas of the organisation to help you prevent, detect, and respond to threats.

#3

Advise on the selection, design and deployment of security products and services.

#4

Plan security assessments and reviews, interpret the results and create resolution plans to help you make well-informed decisions on the risks you face.

#5

Help you achieve compliance with relevant industry standards such as GDPR and Cyber Essentials (Plus).

#6

Provide informal training to IT and security staff.

#7

Provide oversight of breach response.

#8

Review security information and event management (SIEM) platforms, investigate alerts and make mitigation recommendations.

#9

Create and maintain security policies, including incident response frameworks, employee security policies, password policies, and patching policies.

#10

Create and maintain incident response plans to help you handle security incidents more effectively and appropriately.

#11

Optimise your Microsoft 365 security.

#12

Offer three levels of support options so that you can choose the best-fit with your IT requirements and business needs, or deliver bespoke support.

With a broad Security portfolio spanning next-generation firewalls, endpoint security, DDoS protection, SIEM, vulnerability management, cyber-breach services and more, why not find out how else Daisy can help improve your security posture?
