

Mobile

● Flexible share tariff improves **business productivity** ●

Overview

Available exclusively on the Vodafone network, Daisy has developed a mobile tariff to help businesses reap the benefits of an unlimited plan without the hefty price tag.

With Daisy Vodafone Tariff, you get unlimited standard calls and texts, with the ability to select and share other allowances across your entire fleet of mobiles.

This means you can bulk buy and share:

- Data
- Roaming bolt-ons (calls and data)
- International (the UK to overseas) call/text bolt-ons

Why choose Daisy Vodafone Tariff?

- Unlimited standard calls and texts in UK and EU
- Flat rate per user (no parent/child system)
- Ability to bulk buy additional value bundles
- A wide range of international and roaming options
- Ability to share international and roaming bolt-ons
- Perfect for a growing or an international business
- Roam Like At Home (RLAH)
- MyAccount portal for 24/7 account management and reporting – set alerts, manage devices and control your spend

Unlike most other mobile plans, the Daisy Vodafone Tariff allows to you pay a single, flat rate per user, plus any other options you require. And, because you're buying in bulk, the more you buy, the more cost-effective it is. Not only that, expensive 'out-of-bundle' calls/data usage becomes less likely, making it ideal for any cost-conscious, growing or international business.

For points of note, see the reverse.

Daisy Data Top-Ups

As part of our ongoing efforts to provide our customers with great value services, we are offering Daisy Data Top-Ups for Daisy Mobile customers. These are a collection of subscription-level data bundles, designed to help you save time and money on out-of-bundle costs once you have breached your standard inclusive allowances.

Points of Note

1. All connections are subject to standard terms and conditions, and prices are based on a 24-month minimum term.
2. Fair Usage Policy – Although we do not specifically restrict the number of standard minutes and SMSs available to each end-user, all devices must be used for the purpose; as such, Daisy does not allow SIMs to be used in any equipment which enables the routing of calls or data (including without limitation, text or picture messages) from fixed apparatus or standard devices to mobile equipment, by establishing a mobile-to-mobile call or transmission. Nor does it allow the use of any equipment which enables the sending of bulk SMS, voice or data services. Daisy reserves the right to suspend service without notice, should we believe that such equipment is being used. During the suspension, the liability for any access charges or calls will rest with the customer.
3. Prices and tariffs are subject to change. Daisy will ensure at least 30 days' notice is given before any changes take effect.
4. Early termination fees – These are applicable in all cases where a cease request (PAC or disconnection) has been submitted or the minimum agreed terms have not been completed. This fee is determined based on the pro-rata cost of line rental remaining from the subscription's date of cease up to the end of the agreement, including any required notice periods.
5. Bolt-ons are applied at the account level and not per mobile phone number. As such only one type of each bolt-on is available per account and they cannot be stacked or duplicated. Please also note that at tariff account level, bolt-ons are developed to only work alongside this tariff and as such, if you apply a bolt-on to an account that has other Vodafone tariffs, users will not benefit from the additional allowance but may be charged.

Full Terms and Conditions are available on request.

Have you thought about?

Take advantage of further benefits to complement Daisy Vodafone Tariff:

Daisy Device Management services allow you to easily roll out and manage security controls and policies for your mobiles, tablets and laptops across all operating systems.

Daisy's eBackup service can protect the data across your mobile estate and deliver a preconfigured replacement.

Daisy WorkPlace turns every employee smartphone into a fully-operational, fully-portable extension of your office IT environment. Cue a whole new level of business mobility and agility.
