

HOW MUCH IS YOUR TIME WORTH?

Do you have the time to spend hours researching everything about the PSTN Switch-off?

Daisy can save you research time and money by offering a virtual consultation (Asset Audit) to organisations that are using PSTN, ISDN or single analogue lines.

We will explain what the Switch-off will mean to your business and give you the knowledge and guidance to plan for your migration.

Who will benefit from a consultation?

- 1 Businesses that are using analogue or ISDN lines for telephony and broadband
- 2 Those who rely on a single analogue exchange line for essential services such as: Security, CCTV, door entry systems, medical devices, health pendants, pathology systems and more... then you need to take action

- 3 Those who are not already familiar with the PSTN Switch-off
- 4 Those who are familiar with the PSTN Switch-off but would like an opinion, or those who are not sure how to plan for the Switch-off

Already have:

FTTP (Fibre to the Premises) Hosted Telephony as well as a plan for your other services that currently rely on a traditional analogue connection?

Congratulations!

This service will not be for you.

Will I get independent advice?

Our service is fully independent of any suppliers, so we can advise without bias towards a particular solution.
